1. Preamble

This Responsible AI Policy sets forth the principles, requirements, and processes for the responsible and effective development, deployment, use, and management of AI systems within Persistent, in alignment with ISO 42001 standards.

This policy is intended to ensure that all AI related activities support the Persistent's business strategy, reflect its core values and culture, align with its risk appetite, adhere to relevant legal and contractual obligations and consider the risk environment while addressing the interests of stakeholders.

This policy does not override any existing policies, processes, or guidance related to privacy, data protection, code of business conduct, intellectual property, or confidentiality.

This policy reflects Persistent's commitment to embrace AI in a responsible, human-centric, sustainable and privacy-preserving manner in the fast-evolving field of AI technology. Persistent is further committed to minimizing the environmental footprint associated with the development and use of AI systems.

2. Scope

- a. This policy applies to all AI-related activities that Persistent shall engage in including but not limited to the design, development, deployment, and evaluation of AI systems, as well as the governance, oversight, accountability, legal, social accountability, and safety of AI.
- b. This policy covers both internal and external AI applications such as those used for operational efficiency, customer commitment, partner collaboration and social responsibility.
- c. This policy also applies to all employees, contractors, vendors, and partners who engage in or are affected by AI-related activities at Persistent.

3. Responsible AI Policy Objective

With the rise of AI, it is vital to establish clear and comprehensive objectives for Responsible AI policy to ensure that the benefits of AI are maximized while its risks are carefully managed. The following policy objectives lay the foundation for guidance on development, deployment, use and governance of AI systems:

- a. Ethical AI deployment
- b. Transparency and explainability
- c. Data quality, cybersecurity and data privacy
- d. Human oversight and accountability
- e. Risk assessment and mitigation
- f. Compliance and regulatory alignment
- g. Governance oversight
- h. Continual improvement

4. Commitment from top management

Persistent management shall provide leadership and commitment with respect to the AI management system to ensure this policy establishes AI objectives that align with strategic direction of its mission, values, and goals enabling responsible and purposeful AI adoption. Persistent's Board Risk Management Committee provides oversight of enterprise risks, including those related to Artificial Intelligence. Leadership is committed to meeting all applicable legal, regulatory, and contractual requirements related to AI, including data protection, fairness, and transparency.

Top management shall ensure:

- a. Responsible AI governance by endorsing, supporting and allocating sufficient resources for the effective implementation of this policy.
- b. AI initiatives align with Persistent's strategy, values and legal obligations and will champion a culture of accountability, transparency and continuous improvement.
- c. Regular review for policy effectiveness, foster cross-functional collaboration and empowerment of stakeholders at all levels to report concerns or suggest enhancements related to AI systems.

5. Responsible AI Principles

Persistent ensures that the development, deployment, and use of AI technologies are guided by following key principles:

- a. Accessibility and inclusiveness
- b. Accountability (clear ownership and accountability for outcomes produced by AI models/tools)
- c. AI expertise
- d. Availability and quality of data
- e. Ethics and responsibility
- f. Explainability and transparency
- g. Fairness (bias prevention and non-discrimination)
- h. Financial well-being
- i. Human involvement
- j. Maintainability
- k. Privacy and security
- l. Reliability and robustness
- m. Human, society and environmental safety

6. Updates to this policy

Persistent may update the Responsible AI Policy to ensure its relevance, adequacy, and effectiveness in the changing context and environment of the organization and the AI technology, as and when the need arises, and the same will be made available on the website, updates to this policy are approved by Responsible AI Council.
